Using Fractions as Numbers

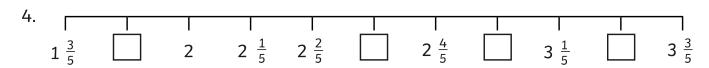

I can use fractions as numbers.

Complete the number lines by filling in the empty spaces.

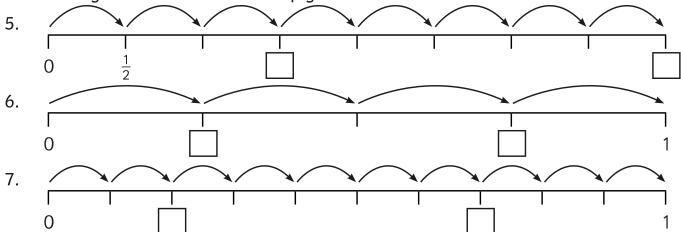

3.
$$2 \quad 2^{\frac{1}{4}} \quad 2^{\frac{2}{4}} \quad 3 \quad 3^{\frac{2}{4}} \quad 3^{\frac{3}{4}} \quad 4^{\frac{1}{4}} \quad 4^{\frac{2}{4}}$$

What are the missing numbers in each of the number lines? Fill in the empty boxes. Count along each number line to help you.

Draw your own number lines including the fractions below. Count up in fraction steps to help you to work out which other fractions will be on your number line.

- 8. $\frac{2}{3}$
- 9. $\frac{3}{6}$
- 10. $1\frac{1}{5}$
